WELCOME

Surveying at one time was considered a "sunset" trade but today, with the introduction of new technologies and strong demand in Big Data management and the initiatives towards a SMART City, we are seeing a surge in the demand for high quality geospatial data set.

This year we are proud to host the 68th Asean Federation of Land Surveying and Geomatics (Asean FLAG) council meeting and Seminar in Singapore at the Amara Hotel from the 4th December 2018 to 6th December 2018.

We have lined up speakers to share on the roles of surveyors in the development of smart cities and in embracing new technologies.

- Mr Loi, President of SISV

Organiser:

We are honoured to invite you to our Seminar held on the 30th October 2018. Our theme for this year is "Spatially Enabled Future Cities". In the last two decades, the roles of surveyors have been changing from pounding of pegs to managing 3D spatial information.

We hope this seminar will provide our fellow surveyors the platform to share, learn, connect, evolve and adapt to these changes and challenges.

Last but not least, I would like to express my sincere thanks on behalf of the Organising Committee for the 68th AFLAG to the sponsors, my committee members, the volunteers in making this happen and SLA for supplying the backdrop image of our Singapore skyline digitally rendered.

- Mr Goh, Chairperson of Organising Committee
